

D DAY

The word 'D DAY' is rendered in large, light blue, semi-transparent block letters. Several military aircraft are flying through the letters. A Spitfire is visible through the first 'D', a B-24 bomber through the second 'D', and another Spitfire through the 'Y'. The background is a light, hazy sky.

D-DAY AT CHURCHILL WAR ROOMS

The Allied invasion of Normandy was a turning point of the Second World War. Launched on D-Day (6 June 1944) the invasion began the liberation of western Europe from Nazi occupation. Its success depended on the cooperation of naval, air and ground forces on a gigantic scale.

During the Second World War, the Cabinet War Rooms were a secret military and political headquarters. In these rooms, Britain's leaders made important strategic decisions.
